

exception

```
classDiagram
    class exception {
    }
    class ArrayEmptyError {
        - what()
    }
    ArrayEmptyError --|> exception
```

The diagram illustrates a class hierarchy. At the top is a class box labeled 'exception'. It has three horizontal compartments: the top one contains the text 'exception', and the other two are empty. Below it is a class box for 'ArrayEmptyError'. This box has three horizontal compartments: the top one contains 'ArrayEmptyError', the middle one is empty, and the bottom one contains '- what()'. A blue arrow with an open triangular head points from the top of the 'ArrayEmptyError' box to the bottom of the 'exception' box, indicating that 'ArrayEmptyError' inherits from 'exception'.

ArrayEmptyError

- what()
